

Project Profile: Wi Not Stop Convenience Store, 2006

Description

This is truly a unique convenience store built by E.E. Wine, Inc. near Manassas, VA.

Details

At 54 feet wide this structure boasts some of the biggest timberframe trusses you will see anywhere let alone in a Wi Not Stop convenience store.

Donovan Wine of E.E. Wine, Inc. loved the idea of building something in the timberframe style and he got his wish when he hired IntelliStructures to assemble and install these trusses fabricated by Blue Ridge Timberwrights.

IntelliStructures installed 6 ½" Insulspan SIPs at the walls and 8 ¼" SIPs on the roof spanning about 11' between each truss. This left ample space for a beautiful application of 8" pine tongue and groove, a nice contrast to the pine trusses that had a butternut stain applied.
