

Project Profile: Timberframe/SIP hybrid, 2008

Description

This beautiful home near Akron, OH is a timberframe structure that seamlessly integrates with SIPs and conventional framing.

Details

Stow, OH near Akron is a busy place, but when this home went up in view of the road, the traffic slowed down to look.

Timber Frame Services, Inc. hired IntelliStructures to install this Riverbend timberframe package and it went together beautifully and efficiently.

The owners knew of a similar project nearby that was less successful because the installation crew was not well qualified. They were very pleased with the ease and professionalism their home was assembled by IntelliStructures.

Included in the installation:

- All floor framing
- All Interior partitions
- Timberframe
- SIPs
- Housewrap
- Roof underlayment
- Windows and doors
- Finish fascia

Time to deliver dried in package: **26 days**
